Education

MASTER OF SCIENCE IN SOFTWARE ENGINEERING | SPRING 2021 | THE UNIVERSITY OF TEXAS AT EL PASO

- Concentration: Secure Cyber-Systems Overall GPA: 3.84

BACHELOR OF BIOLOGICAL SCIENCES | FALL 2017 | THE UNIVERSITY OF TEXAS AT EL PASO

- Concentration: Biomedical Overall GPA: 3.57

Certifications, Skills & Awards

- ISC² CISSP 1490681 08/2023
- CompTIA Security+ COMP001021993773 04/2022
- CEH v11 ECCC4928761305 12/2021
- Java, Python and PHP Programming Languages.
- Experience with Penetration Testing industry standard tools, subscription only & open-source.
- Software Design and Requirements definition.
- LULAC Excellence in Public Service Team Award 2023

Experience

COMPUTER SCIENTIST - VULNERABILITY ASSESMENT ANALYST | ARMY DAC | 09/2021 TO PRESENT

- Contributes to the **US ARMY DEVCOM ANALYSIS CENTER's mission of improving information systems** and overall battlefield used systems, by participating in events to conduct analysis on the system's security posture, resilience and processes. Participates in discussions with system stakeholders to provide expert insights and recommendations to enhance system security.
- Co-lead a project aimed at deploying and replicating a **military tactical network on cloud infrastructure**, leveraging advanced technologies to achieve operational objectives. The goal of this project is for other cyber defenders to develop their expertise in **emerging defensive cyber security technologies** in a lab environment.
- Team leader of a DAC innovation project that leverages **ML for Cybersecurity Tool Development and enhancement**. Research's existing tool solutions and conducts code refactoring cycles to enhance and improve in-house tool development.
- Co-lead of DAC's talent management program. Leads and organizes over 10+ events every year to showcase DAC's involvement and commitment to **engaging communities in the STEM field**. Events include career fairs, presentations, and hands-on workshops to engage students with students and promote opportunities to pursue a career as a government civilian employee.
- Customer/Faculty in Capstone Level courses at The University of Texas at El Paso Computer Science bachelor's degree since Spring 2022. Assists 90+ students in crafting a **Software Requirements Specification (SRS)** document. Conduct bi-weekly Q&A sessions to offer guidance and ensure hands-on experience in real-world SRS development. Guide students in the **creation and refinement of UML diagrams** (e.g., use case, state-machine, and data-flow diagrams) to support requirements solicitation and improve their understanding of system functionality. Provide iterative feedback to enhance clarity and completeness of both written and visual requirements
- **Guides and Mentors DAC's college intern cohorts**. Shares technical and professional guidance with interns year-round.

RESEARCH ASSISTANT | ARMY RESEARCH LABORATORY | 05/2021

06/2019 TO

- Developed a 2-part MySQL and web vulnerabilities workshop using PHP and Python. The workshop presents a vulnerable website that participants can exploit using **open-source penetration testing tools** such as sqlmap and Hydra.
- Publication: ARL-SR-0439 Feb 2021

- Verified **security controls and identified security weaknesses of four different systems comprising 100+ servers**. In accordance with an approved rule of engagement, the security control verification involved testing security controls in web applications, operating systems, and databases.
- Tasked with submitting a report detailing which controls were tested, how the controls were tested, and the results of each conducted test.
